2020 Edition - Bursaries Announcement

Québec, May 17th 2021 - The **ESTEN Foundation** announced on May 15th the recipients of the first edition of its Onsite Wastewater Applied Research and Innovative Projects Bursaries.

All applications received were for the Applied Research category. We wish to thank all participants.

The **ESTEN Foundation** is pleased to award the 1st place 1500\$ bursary to **Dominique Claveau-Mallet**, researcher at École Polytechnique (Montréal, Qc) for the following submitted research: *Phosphorus Removal and Carbon Dioxide Capture in a Pilot Conventional Septic System Upgraded with a sidestream Steel Slag Filter.*

The 500\$ bursary for the second place is awarded to **Céline Vaneekhaute**, researcher at University Laval in Québec City for the following submitted research: *Development of resilient municipal wastewater treatment infrastructure targeting water reuse in Nunavik.*

The **ESTEN Foundation** is also pleased to announce that it will pursue the bursaries initiative for 2021 for both Applied Research and Innovative Projects categories.

We encourage applicants to submit their projects right now on the foundation website at www.estenfoundation.org

Congratulations to this year's recipients.

Daniel Roch, president

The **ESTEN Foundation** is a non-profit organization created by **Enviro-STEP Technologies** and **Enviro Neptune** in cooperation with several players in the field of Onsite Wastewater in Canada. The mission of the ESTEN foundation is to encourage research, development and innovation in connection with the Onsite Wastewater industry and water protection, through grants, donations and targeted initiatives.
